LINCOLN AUTOMATIC LUBRICATION SYSTEM OFFERED AS FACTORY-INSTALLED OPTION ON CASE IH COMBINES

ST. LOUIS . . . Lincoln has introduced an automatic lubrication system available for select Case IH combines. The Quicklub[®] Automatic Lubrication System is now offered as a factory-installed option on Case IH 2500 Series Combines, model year 2007, manufactured in Grand Island, Neb.

Completely reliable and fully automatic, the system is designed to provide worry-free maintenance and prevent costly repairs and downtime by delivering the correct amount of grease while in the field. With an automatic lubrication system, small measured amounts of grease are metered to the components as often as every hour while the combine is in operation. This process lubricates critical wear surfaces while maintaining a grease seal to block chaff and other crop contaminants from the lubricated area.

For more information on Lincoln's Quicklub Automatic Lubrication Systems for the agricultural market, contact Bob Tanner, National Account Manager - Agriculture, at 1-314-651-8223, or visit our web site at www.lincolnfarms.com.

Established in 1910, Lincoln is a world leader in the manufacture and sale of lubrication and industrial pumping equipment for industry. Lincoln headquarters are located at One Lincoln Way, St. Louis, Mo. 63120-1578.
