

AUTOMATED LUBRICATION SYSTEM

Why an automated lubrication system is better.

Manual Lubrication

- Inconsistent lubrication
- Can't lubricate while running
- Potential contamination
- Premature pin, bushing and bearing wear
- Labor expense/morning maintenance

vs.

Automated Lubrication

- Constant lubrication (runs every 30 min.)
- Lubes while combine runs
- Closed system-no contamination
- Extended component life
- Less downtime

AUTOMATED LUBRICATION SYSTEMS KITS

Part number B96372

Kit Part Numbers

<u>Part Number</u>	<u>Description</u>	<u>Application</u>
B96372	Automated lubrication system	2100 & 2800 series
B96374	Automated lubrication system	1020 header
B96092	Quick fill grease gun	Case IH Automated Lube Systems

New Auto-lube System Kit is designed to service over 40 lubrication points on the combine. Kit available for 1020 header designed to service 13 lubrication points.

System Features and Benefits

- The auto-lube systems have been in use for 30 plus years, with use on off-road equipment since 1994. Currently available for Case IH Big Square Balers and Cotton Pickers.
- Increases combine uptime - minimum of 1/2 hour productivity per day - by eliminating daily manual lube.
- Significantly increases the life of components by lubricating automatically, once an hour, with small amounts of grease *while the machine is in operation!*
 - contaminants are purged and effective seals are created
 - fresh grease is maintained on all critical wear surfaces
- Reduces manual labor for daily lubrication and repairs.
- Eliminates wasted grease resulting from manual lubrication.

The system consists of a 12 VDC electric pump designed to pump Case IH 251H grease. It incorporates an easy accessible, adjustable timer and a clear, high impact polymer reservoir for visual indication of lubrication level.

The grease is proportioned by positive displacement metering valves that supply the proper amount of grease to each component. Each incorporates an indicator pin for confirmation of system operation.

Kit includes all components and installation instructions.
