

Lincoln's Quicklub[®] Automated Lubrication Systems

"We installed Lincoln Quicklub automated lube systems on our John Deere combines to minimize our service repairs."

"Combine components that are notorious for early failure are still performing well. The payoff is worth it."

"We have extreme confidence in our machines. Our customers know that we will deliver a quality, well-maintained machine that is not going to breakdown in the field."

"MachineryLink is a leader in our industry by utilizing leading-edge technology, and Lincoln is a partner in that achievement."

**Andy Smaltz
Operations Director, MachineryLink, Inc.**

MachineryLink, Inc., based out of Kansas City, Missouri, is the nation's largest provider of leased combines.

As part of their stated corporate strategy of managing Ag equipment assets for the greatest return on equity, they equipped more than 100 John Deere combines with Lincoln Quicklub automated lubrication systems over the last two years. The results have been excellent for both MachineryLink and the users of this equipment.
